

Rise & Crumb order-ahead flow, redesigned.

Five connected screens, from browsing the menu to a confirmed pickup. Plus a clickable prototype, a tap-through version you can try on your phone before anything is built, and 12 reusable parts (components) that keep every screen consistent.

How the **flow connects.**

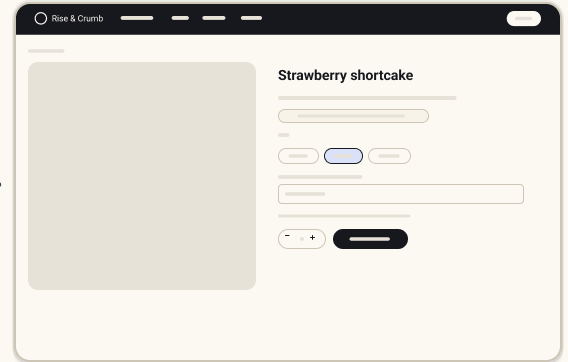

Every tap in the prototype, mapped. You get a link, so you can tap through it on your computer or phone before anything gets built.

ALSO CLICKABLE

- Filter buttons on Menu
- Size and quantity on Product
- Edit and remove in Bag
- Time and payment choices at Checkout

FOR YOUR DEVELOPER

One set of parts, every screen.

What this means for you: 12 reusable parts keep every screen consistent, and a change made once shows up everywhere.

Checkout, annotated

What this means for you: customers see their pickup time and total before they pay, and your developer knows exactly how checkout should work.

Order summary

Strawberry shortcake	\$38.00
Croissants × 2	\$7.50
Cookie × 1	\$2.50
Tax	\$3.36
Total	\$51.36

Place order · \$51.36

Free cancellation until 24 hrs before pickup.

1 Time chips are a radio group

One date and one time can be selected. Unavailable times are hidden, not greyed out. Arrow keys move focus.

2 Labels stay visible

Inputs use the Input component. Validate on blur; show errors under the field in plain words.

3 Summary is sticky

On desktop the summary stays in view while scrolling. On mobile it becomes a bottom bar with the total.

4 Button shows the total

"Place order · \$51.36" updates live. Disable it with a spinner while the payment processes.

Want your whole process redesigned? Ask for a fixed quote at theclickclickstudio.com/contact. I reply within two business days.
